3 Tunnel out. Return directly.
04 Where mobility costs time.
03 Tunnel out. Return directly.
04 Where mobility costs time.
CN still addresses the permanent home IP; HA redirects delivery.
Handoff interruption = attachment + discovery + registration completion
Failure and delay points along the workflow
Loss mitigation is not always latency reduction.
Remove the binding; ordinary delivery resumes.
5 One district. Two architectures.

Classic Mobile IPv4 + Foreign-Agent Care-of Address
What each component contributes
The MN changes links, not its permanent IP address.
An authenticated exchange creates the mobility binding.
03 Tunnel out. Return directly.
04 Where mobility costs time.
